Dear Patient,

We welcome you to Dallas Podiatry Works. There are many podiatry practices here in the Metroplex, and we are honored that you have chosen us to address your needs. The doctors and staff strive to provide state of the art care in a professional, compassionate and friendly environment.

In addition to treating common foot pathology, such as ingrown toenails, bunions and heel pain, we treat the simple and complex complications of the foot and ankle associated with diabetes and arthritis, sports related injuries and other trauma, reconstructive foot and ankle surgery, flatfoot deformity in adults and children, and conditions of the skin. Comprehensive care is given to patients with wounds and in need of diabetic shoes, customs orthotics, and braces. Injectable fillers to supplement lost padding in the forefoot and cosmetic nail restoration are available.

Our congenial staff is trained to accommodate the special needs of our patients. Our web site offers the opportunity to learn about us, a variety of pathologies afflicting the foot and ankle as well as the ability to fill out registration and history forms prior to arriving in our office. The use of electronic medical records allows us to electronically send and renew your prescriptions, stay in close contact with your other health care providers and better manage your medical information.

Enclosed you will find important information about our doctors, our locations, new patient forms, and patient financial policies. Please take the time to review the enclosed documents, fill out the forms completely, and bring them with you to the first appointment, along with your drivers license and health insurance card. For your convenience you can also email them to dallaspodiatryworks@yahoo.com. We are available to address all questions and concerns you may have. Thanks again for being a Dallas Podiatry Works patient and welcome aboard!
